

TEROSON PU 8730 HMLC

Direct Glazing for Professionals

**New Henkel Crash Test Standard for the direct glazing aftermarket
Safe Drive Away Time (SDAT) after 30 minutes!**

The Henkel Crash Test Standard is based on the most challenging requirements of two existing crash test standards, European and US. The test demonstrates the capabilities of the adhesive TEROSON PU 8730 HMLC to provide increased safety within 30 min SDAT!

The one component TEROSON PU 8730 HMLC will make your professional windscreen replacement even faster and more efficient. The product is cold-applied and can be used with a powerful standard foil cartridge gun.

Key Benefits of TEROSON PU 8730 HMLC

- Fast safe drive-away time after 30 minutes
- Re-calibration of Advanced Driver Assistance Systems (ADAS) 30 min after bonding
- HMLC (high modulus, low conductivity)
- One component cold applied (no warm up needed)
- Very good sag resistance
- High reactivity - 10 minutes open time
- High elasticity and shear strength, even after aging
- Primerless adhesion to residual bead
- High UV resistance
